CLA 131 MEDICAL TERMINOLOGY FROM GREEK & LATIN – 001 & 002 Computer-Assisted Instruction Caldesi-Valeri (vcaldesiv@uky.edu)

Medical Terminology is designed to acquaint the student with medical vocabulary that derives from Latin and Greek and to explore the etymologies through which medical prefixes, suffixes, and combining forms came into their modern usages in the various departments of medicine. Unlike a normal classroom course, CLA 131 is a computer-assisted, self-paced course designed for students planning careers in the health services. Students study independently using the text and available computer resources and are tested through the semester on their competency with the material.
